Tom and Dan,

This is still pending coordination with the rest of the team but we are looking at some time the week of March 14. Is there a time that week when you could be here?

Phil,

I was going to send you a note thanking you for your time and attention last week but you beat me to it. I prioritize this issue very highly and if we can find dates that work I can come to Anch again to meet with you and the team. Let's correspond with respect to dates. I am most flexible prior to the last week in March because I begin teaching then but a quick trip during the teaching quarter is possible too. Indeed, the April event that you refer to is going to get sandwiched between lectures.

best wishes,

Tom
